Disclosures

- Speaker's fees – Gilead Sciences, Inc.

Background

- Since 2015, there has been considerable attention placed on minimizing the incidence of and mortality related to HCV through increased testing and treatment.
- Several studies have observed substantial declines in testing for HCV during the severe acute respiratory syndrome coronavirus-2 (SARS-CoV-2) pandemic, which could have consequences on achieving elimination of HCV.

Objective

To determine the effect of the SARS-CoV-2 epidemic on HCV testing and commencing anti-HCV treatment in individuals with HIV across Europe, particularly in those with a previous HCV infection for whom the risk of HCV re-infection is substantially increased.

Study design

Prospective, longitudinal cohort study of individuals with HIV

Inclusion criteria:

- Participating between January 2016 and December 2021
- Had a positive anti-HCV antibody test (i.e., susceptible for HCV re-infection and eligible for HCV-RNA testing)

Follow-up:

- From 1 January 2016 or date enrolled until last visit, withdrawal date or death, prior to the censoring date (i.e., 31 December 2021).

Statistical analysis

Endpoints:

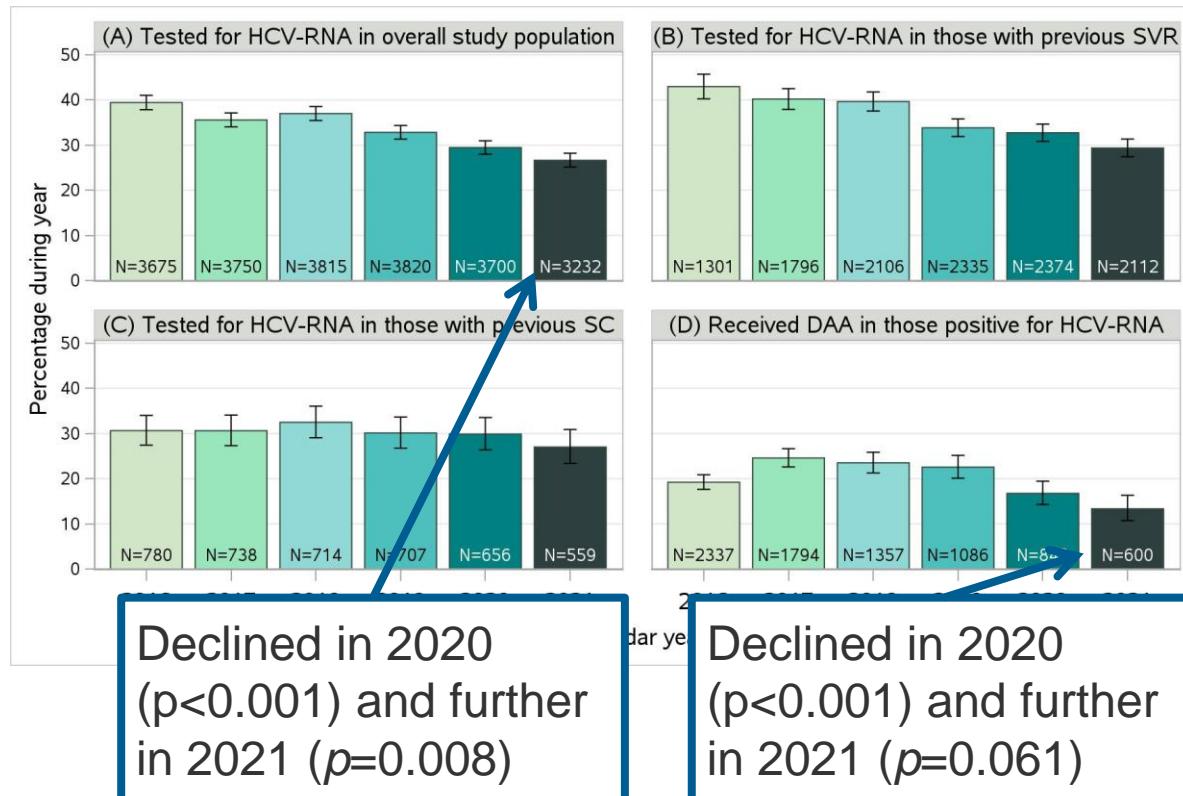

- Proportion of anti-HCV positive individuals who received an HCV-RNA test for each calendar year.
- Proportion of HCV-RNA positive individuals who commenced treatment with direct-acting antivirals (DAA) at any time during the year for each calendar year.

Models:

- Multivariable logistic regression with generalized estimating equations, adjusted for age, sex, ethnicity, HIV transmission risk, region, CD4+ cell count, ART use, prior comorbidities.

Results

Figure. Testing for hepatitis C virus (HCV) RNA and commencing direct acting antivirals (DAA) during 2016-2021

Conclusions

- In individuals susceptible to HCV reinfection and eligible for HCV-RNA testing, there were declines in HCV testing in the first year of the SARS-CoV-2 epidemic and subsequent declines in the year thereafter.
- For those with chronic HCV, significant decreases in commencing DAA-treatment were also seen during the SARS-CoV-2 epidemic.
- Whether these declines are sustained in the prolonged era of SARS-CoV-2 warrants further investigation.

The EuroSIDA Study Group

The multi-centre study group, EuroSIDA (national coordinators in parenthesis):

Albania: (A Harxhi), University Hospital Center of Tirana, Tirana. **Argentina:** (M Losso), M Kundro, Hospital JM Ramos Mejia, Buenos Aires. **Austria:** (B Schmied), Klinik Penzing, Vienna; R Zangerle, Medical University Innsbruck, Innsbruck. **Belarus:** (I Karpov), A Vassilenko, Belarusian State Medical University, Minsk; VM Mitsura, Gomel State Medical University, Gomel; D Paduto, Regional AIDS Centre, Svetlogorsk. **Belgium:** S De Wit, M Delforge, Saint-Pierre Hospital, Brussels; E Florence, Institute of Tropical Medicine, Antwerp; L Vandekerckhove, University Ziekenhuis Gent, Gent. **Bosnia-Herzegovina:** (V Hadziosmanovic), Klinicki Centar Univerziteta Sarajevo, Sarajevo. **Croatia:** (J Begovac), University Hospital of Infectious Diseases, Zagreb. **Czech Republic:** (L Machala), D Jilich, Faculty Hospital Bulovka, Prague; D Sedlacek, Charles University Hospital, Plzen. **Denmark:** T Benfield, Hvidovre Hospital, Copenhagen; J Gerstoft, O Kirk, Rigshospitalet, Copenhagen; C Pedersen, IS Johansen, Odense University Hospital, Odense; L Ostergaard, Skejby Hospital, Aarhus, L Wiese, Sjællands Universitetshospital, Roskilde; L N Nielsen, Hillerød Hospital, Hillerød. **Estonia:** (K Zilmer), West-Tallinn Central Hospital, Tallinn; Jelena Smidt, Nakkusosakond Siseklinik, Kohtla-Järve. **Finland:** (I Aho), Helsinki University Hospital, Helsinki. **France:** (J-P Viard), Hôtel-Dieu, Paris; K Lacombe, Hospital Saint-Antoine, Paris; C Pradier, E Fontas, Hôpital de l'Archet, Nice; C Duvivier, Hôpital Necker-Enfants Malades, Paris. **Germany:** (J Rockstroh), Universitäts Klinik Bonn; O Degen, University Medical Center Hamburg-Eppendorf, Infectious Diseases Unit, Hamburg; C Hoffmann, HJ Stellbrink, ICH Study Center GmbH & Co. Funding: EuroSIDA has received funding from ViiV Healthcare LLC, Janssen Scientific Affairs, Janssen R&D, Bristol-Myers Squibb Company, Merck Sharp & Dohme Corp, Gilead Sciences and the European Union's Seventh Framework Programme for research, technological development and demonstration under EuroCoord grant agreement n° 260694. The participation of centres from Switzerland has been supported by The Swiss National Science Foundation (Grant 148522). The study is also supported by a grant [grant number DNRF126] from the Danish National Research Foundation and by the International Cohort Consortium of Infectious Disease (RESPOND).
